

CALL FOR PAPERS

ICCRTU 2020
Apr 23-24, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCRTU 2020 : International Conference on Chemical and Radiological Toxicity of Uranium is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical and Radiological Toxicity of Uranium. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Uranium chemistry
Depleted and natural uranium
Chemical forms of uranium
Nuclear properties of uranium
Characteristics of uranium and its compounds
The radiochemistry of uranium
Toxicology of depleted uranium
Chemical and radiological toxicity of uranium
Chemical thermodynamics of uranium
Ore processing and separation

Properties of free atoms and ions
Uranium metal
Compounds of uranium
Chemical bonding in uranium compounds
Structure and coordination chemistry of uranium complexes
Uranium complexes in solution and the solid state
Uranium chemistry in solution
Organometallic and biochemistry of uranium
Analytical chemistry of uranium
