

CALL FOR PAPERS

ICASEM 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASEM 2020 : International Conference on Automated Software Engineering and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Automated Software Engineering and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Automated software engineering	Model-driven engineering
Automated reasoning techniques	Model transformations
Component-based systems	Open systems development
Computer-supported cooperative work	Product line methods
Configuration management	Program understanding
Data mining for software engineering	Program synthesis
Domain modeling and meta-modeling	Program transformation
Empirical software engineering	Re-engineering
Human-computer interaction	Requirements engineering
Knowledge acquisition and management	Specification languages
Maintenance and evolution	Software Analysis
Testing, verification, and validation	Software architecture and design
Software visualization	Model-based software development
