

CALL FOR PAPERS

ICCLCPESP 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCLCPESP 2020 : International Conference on Visible Light Communication, Positioning and Efficient Signal Processing is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Visible Light Communication, Positioning and Efficient Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Optical antenna design for VLC
Channel modeling and
characterization
Information theory for VLC
Channel estimation for VLC
Coding and modulation for VLC
Efficient signal processing for
VLC
MIMO technologies for VLC

MAC protocols for VLC
Network-layer protocols for VLC
Cross-layer optimization for VLC
Visible light positioning
Security issues for VLC
VLC standardization
