

CALL FOR PAPERS

ICCPA 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPA 2020 : International Conference on Computational Pathology and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Pathology and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Artificial intelligence and deep learning for computational pathology
Stain normalization/standardization
Detection, classification and segmentation of tissue structures (cells, glands etc.)
Detection and discovery of predictive and prognostic tissue biomarkers
Whole-slide image analysis
Registration of whole-slide images

Immunohistochemistry scoring
Multiplexed staining
Unlabeled multiplexing
Crowdsourcing for ground truth collection and machine learning applications
Applications of computational pathology in the clinic
