

CALL FOR PAPERS

ICEMMWTL 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEMMWTL 2020 : International Conference on Engineering Metamaterials and Metamaterial Waveguides and Transmission Lines is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Engineering Metamaterials and Metamaterial Waveguides and Transmission Lines. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Active, smart, and controllable metamaterials
Metamaterials for green energy
Metamaterials for radiative heat transfer
Metamaterials for biomedical applications
Fractal and topological metamaterials

Metamaterials for absorbers and energy harvesters
Metamaterial antennas and sensors
Metamaterials for wave front and polarization control
Metamaterial waveguides and transmission lines
Metamaterial-inspired filters, phase shifters and delay lines
