

# CALL FOR PAPERS

**ICNEE 2020**  
**Apr 23-24, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNEE 2020 : International Conference on Nanotechnology for Environment and Energy is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanotechnology for Environment and Energy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green nanotechnology  
Clean and green nanotechnology  
Green nanoelectronics  
Green synthesis of nanomaterials  
Green nanomanufacturing  
Nano-enhanced green technology  
Nano-enhanced energy technologies  
Nano-enhanced clean-up technologies  
Nano-enhanced green industry technologies  
Green nano policy  
Challenges and opportunities to green nanotechnologies  
Novel nanomaterials and devices  
Nanomaterials for building and construction

Nanomaterials for energy conversion  
Nanomaterials for solar cells, fuel cells, batteries, and so forth  
Nanostructures for phase-change materials  
Nanomaterials for environment protection or improvement  
Energy and environment relevant nanotechnology  
Nanotechnology for electrochemical conversion and energy storage  
Nanotechnology for hydrogen production and storage  
Nanotechnology for photocatalysis and environmental catalysis  
Nanotechnology for water treatment, decontamination, in-door air purification, air pollution, and so forth  
Environment, human health, and safety issues of nanotechnology  
Green nanotechnology  
Recent trends in nanotechnology
