

CALL FOR PAPERS

ICSM 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSM 2020 : International Conference on Smart Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Smart Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Smart manufacturing
- Smart manufacturing strategies
- Automated material handling
- Big data analytic and applications
- Computational intelligence for smart manufacturing
- Data mining and production improvement
- Data science and machine learning for smart manufacturing
- Decision support systems
- Decision technologies for smart manufacturing
- Equipment productivity improvement
- Intelligent cooperation and resource planning
- Manufacturing intelligence and manufacturing informatics
- Mobile and wireless applications
- Product design and virtual design
- Yield enhancement systems and Condition monitoring of equipment and processes
- Energy efficiency, efficient design and systems
- Autonomous manufacturing
- Cyber-physical systems
- Computer-automated design
- Computational intelligence
