

CALL FOR PAPERS

ICSMNFRWT 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMNFRWT 2020 : International Conference on Separation Methods, Nuclear Fuel Reprocessing and Waste Treatment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Separation Methods, Nuclear Fuel Reprocessing and Waste Treatment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Separation techniques for nuclear fuel reprocessing
Separation techniques radioactive waste treatment
Engineering and safety of radioactive materials separations processes in the nuclear fuel cycle
Advanced aqueous separations engineering
On-line monitoring for process control and safeguards technology
Development and application of separation and extraction processes
Fission product separations

Combined systems for simultaneous radionuclide extraction
Emerging and innovative treatment techniques
Pyrochemical processes and engineering
Solid phase extraction
Supercritical fluid and ionic liquid extraction
Biological treatment processes
