

# CALL FOR PAPERS

**ICUDT 2020**  
**Apr 23-24, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUDT 2020 : International Conference on Ultrasonics and Doppler Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ultrasonics and Doppler Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ultrasound engineering, imaging and clinical applications  
Ultrasonic measurement of material properties  
Physics and computer simulations  
Transducer technologies  
Ultrasound tomography and reconstruction  
Tissue characterization  
Elastography

Motion and deformation imaging  
Ultrasound hardware development and evaluation  
Ultrasonic imaging, photoacoustic imaging and Doppler techniques, including transducer and array technology  
Signal processing and pattern recognition  
Ultrasound-guided intervention and robotic ultrasound imaging  
Ultrasonic and photoacoustic characteristics of tissue and their dependence on physical and biological variables
