

CALL FOR PAPERS

ICVNCDA 2020
Apr 23-24, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICVNCDA 2020 : International Conference on Vehicular Networks, Communications and Data Aggregation is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Vehicular Networks, Communications and Data Aggregation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

V2X communications, V2V, V2R, V2P, V2I, V2S

Routing, data dissemination, data aggregation, path section, optimization

Medium access protocols, congestion control, prioritization techniques

Green computing, energy consumption, energy harvesting, lifetime maximization.

Secure communication, security optimization, distributed security,

Privacy preservation, privacy loss, secure communication,

Video transmission, video encoding/decoding, video compression,

Edge computing, fog computing, cloud computing, distributed computing,

Localization, geographic, GPS outage, GPS free, GPS assisted

Propagation modelling, interference, path loss modelling
