

CALL FOR PAPERS

ICIT 2020
Apr 09-10, 2020
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIT 2020 : International Conference on Intelligent Transportation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Transportation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Intelligent transportation
- Transport technology
- Transport infrastructure and vehicles
- Automatic fare Collection
- Station management
- Wayside control
- Rolling stock system
- Traffic management
- Control room
- Intelligent transportation system
- Transport and traffic management
- Wireless communications

- Computational technologies
- Floating car data/floating cellular data
- Sensing technologies
- Inductive loop detection
- Video vehicle detection
- Bluetooth detection
- Audio detection
- Information fusion from multiple traffic sensing modalities
- Intelligent transportation applications
- Emergency vehicle notification systems
- Automatic road enforcement
- Variable speed limits
- Collision avoidance systems
