

CALL FOR PAPERS

ICSM 2020
May 14-15, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSM 2020 : International Conference on Smart Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Smart Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

| | |
|---|--|
| Smart manufacturing | Manufacturing intelligence and manufacturing informatics |
| Smart manufacturing strategies | Mobile and wireless applications |
| Automated material handling | Product design and virtual design |
| Big data analytic and applications | Yield enhancement systems and |
| Computational intelligence for smart manufacturing | Condition monitoring of equipment and processes |
| Data mining and production improvement | Energy efficiency, efficient design and systems |
| Data science and machine learning for smart manufacturing | Autonomous manufacturing |
| Decision support systems | Cyber-physical systems |
| Decision technologies for smart manufacturing | Computer-automated design |
| Equipment productivity improvement | Computational intelligence |
| Intelligent cooperation and resource planning | |
