The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBRCPD 2020 : International Conference on Braided Rivers, Channel Patterns and Dynamics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Braided Rivers, Channel Patterns and Dynamics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Braided rivers  
Braided-river systems and characteristics  
River channel patterns  
Braided river ecology  
Braided river landforms  
Depositional models of braided rivers  
The mathematics of braided rivers  
Braided river protection

Process and deposits  
Morphological dynamics in braided rivers  
Channel dynamics in braided rivers  
Planform dynamics of braided rivers  
Ecology and management  
Braided river conservation and management  
Computing representative networks for braided rivers
