

CALL FOR PAPERS

ICMOG 2020
May 21-22, 2020
Berlin, Germany

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMOG 2020 : International Conference on Marine Organic Geochemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Organic Geochemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|---|
| Marine geochemistry | Benthic fluxes and early diagenesis |
| Sources and components of marine sediments | Geochronometry of marine deposits |
| Global patterns of sediment distribution | Elemental and isotopic proxies of past ocean temperatures |
| Physico-chemical controls on seawater | Geochemical evidence for quaternary sea-level changes |
| Controls on trace metals in seawater | The oceanic CaCO_3 cycle |
| Gases in seawater | Quaternary seawater composition |
| Marine bio-inorganic chemistry | Cenozoic ocean chemistry |
| Marine organic geochemistry | Bacteria and marine biogeochemistry |
| The geochemical budget for seawater | Marine carbonates |
| Estuarine and coastal processes | Sulfur cycling and methane oxidation |
| Hydrothermal processes | Reactivity of iron |
| Tracers of ocean mixing | Gas hydrates in marine sediments |
| Chemical tracers of particle transport | Conceptual models and computer models |
