

CALL FOR PAPERS

ICNOGA 2020
May 21-22, 2020
Berlin, Germany

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNOGA 2020 : International Conference on Nuclear Organization and Gene Activation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nuclear Organization and Gene Activation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nuclear organization	A/b compartments
Spatial distribution of chromatin within a cell nucleus	Chromosome territories
Importance	Nuclear organization and genome function
History and methodology	Long-range interactions
Architectural proteins	Gene activation
Levels of nuclear organization	Epigenetic silencing
Linear DNA and chromosome basics	Chromatin organization
DNA looping	Histones
Chromosomal domains	Chromatin remodeling enzymes
Self-interacting domains	CCCTC-binding factor
Lamina-associating domains and nucleolar-associating domains	Cohesin
