

CALL FOR PAPERS

ICSCDM 2020
May 21-22, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCDM 2020 : International Conference on Stem Cell Differentiation and Mechanisms is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Stem Cell Differentiation and Mechanisms. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cellular differentiation	Trithorax group proteins
Stem cell differentiation	Dna methylation
Mammalian cell types	Nucleosome positioning
Dedifferentiation	Role of signaling in epigenetic control
Mechanisms	Effect of matrix elasticity on differentiation
Predictive modelling	Processes
Cell differentiation and development	Growth and development
Epigenetic control of cellular differentiation	Cellular processes
Importance of epigenetic control	Structures and functions of the cell
Mechanisms of epigenetic regulation	Internal cellular structures
Pioneering factors	Chemical and molecular environment
Polycomb repressive complex
