

# CALL FOR PAPERS

**ICAMSNE 2020**  
**May 14-15, 2020**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMSNE 2020 : International Conference on Advances in Material Science and Nanostructure Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Material Science and Nanostructure Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials Science and Engineering:

Energy Materials

Mining and Metallurgy

Surface Science and Engineering

Biomaterials and Tissue

Engineering

Materials Chemistry and Sustainable  
Chemistry

Biophysics and Systems Biology

Electronic, Optical and Magnetic  
Materials

Advances in Instrumentation

Technology

Polymer Science and Materials

Emerging Areas of Materials  
Science

Composite Materials

Big data in Materials Science

Metamaterials, Metadevices, and  
Metasystems

Advances in Nano Materials Science

Advances in Dielectric Materials  
and Electronic Devices

Graphene Materials and  
Technologies

Industrial Coating Materials

Ceramic Materials

Reconfigurable Materials and

Molecular machines

Novel Materials for Energy

Applications

Soft Matter-rich Materials Science

Smart Materials

Solid State and Materials Science

Nanostructure Engineering
