

CALL FOR PAPERS

ICASRM 2020
May 14-15, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASRM 2020 : International Conference on Advances in Superconducting Rotating Machines is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Superconducting Rotating Machines. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconducting rotating machines
Advances in superconducting
rotating machines
Recent advances in superconducting
rotating machines
Superconducting rotating machines
for industrial applications

Advantages and disadvantages of
superconducting electric machines
Development status of
superconducting rotating machines
High power density superconducting
rotating machines
High-temperature superconductors
versus low-temperature
superconductors
