

CALL FOR PAPERS

ICREFMA 2020
May 04-05, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICREFMA 2020 : International Conference on Renewable Energy Forecasting, Modeling and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Renewable Energy Forecasting, Modeling and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Renewable energy forecasting
Renewable energy forecasting models
and simulations
Wind energy forecasting models
Mathematical methods for optimized
solar forecasting
Solar power forecasting
Short term solar power forecasting
based on satellite images
Wave energy forecasting models
Forecasting of wind power
generation

Characterization of forecast errors
and benchmarking of renewable
energy forecasts□
Applications of forecasting to
power system management and
markets
Renewable forecasting and
electricity markets
Forecasting for the estimation of
reserves into power systems
Forecasting for storage management
Dynamic line rating forecasting
The role of predictability in the
investment phase of wind farms
