

# CALL FOR PAPERS

**ICAAAMG 2020**  
**May 18-19, 2020**  
**Sydney, Australia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAAAMG 2020 : International Conference on Advances in Alkali-Activated Materials and Geopolymers is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Alkali-Activated Materials and Geopolymers. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cost and environmental impact  
optimization of mix designs  
(especially in terms of alkali  
activators)  
Admixture development  
Micro and nanostructural  
characterization of AAMs  
One-part mix designs ("just add  
water" dry mixtures)

Durability of AAMs  
Life cycle assessment (LCA)  
Applications in environmental  
engineering such as catalysis and  
water treatment
