

CALL FOR PAPERS

ICEEMMS 2020
May 18-19, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEMMS 2020 : International Conference on Energy Efficiency in Mechanical Manufacturing Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Efficiency in Mechanical Manufacturing Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy-efficiency in mechanical manufacturing systems with advanced manufacturing processes
Effective index systems for energy efficiency evaluation
Real-time energy efficiency assessment of components and systems

Online acquisition of energy efficiency data with system's feedback learning loops
Energy consumption and energy efficiency improvement for manufacturing processes
