

CALL FOR PAPERS

ICIOTB 2020
May 18-19, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIOTB 2020 : International Conference on Internet of Things and Blockchain is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Internet of Things and Blockchain. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Blockchain in IoT device identification management
Blockchain in IoT device authentication, authorization and access control
Blockchain in IoT data security
Blockchain in IoT system security
Blockchain in IoT supply chain management
Blockchain in M2M communications
Blockchain in low power IoT communication networks
Blockchain platforms for IoT development
Blockchain-based IoT system development tools
Blockchain implementation in IoT embedded systems
Blockchain in smart home applications
Blockchain in smart building applications

Blockchain in smart city applications
Blockchain in smart healthcare applications
Blockchain in smart transport applications
Blockchain in smart power system applications
Blockchain in smart manufacturing system applications
Blockchain in smart agriculture system applications
Blockchain in smart oil industry applications
Blockchain-based IoT system: test beds
Blockchain-based IoT system: simulation tools
Blockchain-based IoT systems: performance analysis
Blockchain applications in IoT: overviews
Blockchain applications in IoT: case studies
