

CALL FOR PAPERS

ICEFCM 2020
May 28-29, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEFCM 2020 : International Conference on Eco-Friendly Construction and Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Eco-Friendly Construction and Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Eco-friendly construction
Eco-friendly construction materials
Green design for sustainability
Sustainability analysis of eco-friendly materials
Sustainable development and green design
Sustainable development and civil engineering
Sustainability efforts in civil engineering
Reasoning techniques and quantification of sustainability
Environmental dynamics
Environmental engineering and science
Modelling environmental dynamics
Population, poverty, environment and climate dynamics
Modelling of the dynamic nature of environmental systems

Mathematical models in environmental engineering
Sustainable development
Green building
Air emission trading
Eco-technology
Biofuels
Building structure
Air pollution and control
Nutrients removal
Habitat reconstruction
Building technology
Anaerobic treatment
Economic instruments
