

CALL FOR PAPERS

ICET 2020
May 28-29, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICET 2020 : International Conference on Ecological Thermodynamics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecological Thermodynamics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ecological thermodynamics
Application of thermodynamic principles in ecology
Ecosystem growth and development
Thermodynamic principles of ecosystems
Ecological thermodynamics models and numerical simulation
Phenomena observed and rationales obtained from ecological thermodynamics

Development of ecological thermodynamics laws
Ecological thermodynamics expression on community succession and ecosystem evolution
Ecological thermodynamics application in systems ecology
Ecological thermodynamics theory and method in ecological engineering
Ecological thermodynamics application in environmental management and evaluation
