

CALL FOR PAPERS

ICMMCN 2020
May 28-29, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMCN 2020 : International Conference on Machine-to-Machine Communications and Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Machine-to-Machine Communications and Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Machine-to-machine communications (M2M)
Applications of M2M
Architecture and components of M2M
M2M data traffic classification
Recent progress in M2M
Networking technology and M2M
The implications of M2M on business models
The implications of large scale M2M use for regulators
M2M for Healthcare
New M2M concepts, applications and services
Energy efficiency in M2M Communications
Physical layer requirements for M2M communications

MAC layer requirements for M2M communications
Security, trust and privacy enhancements for M2M
Scalable system architecture and components for M2M communications
Self-organization and autonomous configuration for M2M
Novel traffic modeling and resource/mobility management
Techno-economic models and case study
Mission-critical and massive M2M Communications
Ultra-reliable M2M Communications
M2M test beds and trials
Radio access technologies and protocols
Spectrum management for M2M
M2M communications standards
