

CALL FOR PAPERS

ICSFMA 2020
May 21-22, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSFMA 2020 : International Conference on Statistical Finance, Modeling and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Statistical Finance, Modeling and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Statistical finance	Stock prices and statistical assets
Statistical methods in finance	Extreme value theory and application
Econophysics and financial markets	Copula and its application
Statistical science and financial engineering	Large volatility matrix
Statistical physics	High-dimensional models for financial data
Behavioral finance and statistical finance	Methods of forecasting and evaluations
Financial statistics and mathematical finance	Parameter estimation in stochastic differential equations
Financial statistics and algorithms
