

CALL FOR PAPERS

ICMIR 2020
Jun 11-12, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMIR 2020 : International Conference on Mechanization and Industrial Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mechanization and Industrial Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Automation, robotics and software engineering
Industrial robotics and mechanical engineering
Control science and engineering
Adaptive, robust and process control
Complex systems
Co-operative control
Identification and estimation
Nonlinear, intelligent and discrete event systems
Hybrid systems
Networked control systems
Sensor network and hybrid systems
Delay systems and neural networks
Fuzzy systems

Control of biological systems
Precision motion control
Control applications
Control engineering education
Automation science and engineering
Man-machine interactions
Process and intelligent automation
Factory modeling and simulation
Home, laboratory and service automation
Network-based systems
Planning, scheduling and coordination
Nano-scale automation and assembly
Instrumentation systems
