

# CALL FOR PAPERS

**ICACST 2020**  
**Jun 11-12, 2020**  
**Copenhagen, Denmark**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACST 2020 : International Conference on Aerospace Communication Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Aerospace Communication Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Aerospace communications	Antennas
Aircraft navigation	Autonomous flight control
Attitude maneuver control	Control design
Communications techniques	Earth terminal systems
Doppler signature classifications	Geoscience and remote sensing
Geophysical image processing	Image recognition
Image analysis	Intersatellite links
Interference suppression	MIMO radar moving target detection
Meteorological radar	Nanosatellites networking
Nano and micro satellites designs	Novel satellite-enabled services
Nonlinear approach to tracking problem	Radar signal processing
Radar detection and imaging	Satellite ground stations
Satellite architecture	Astronomical image processing
