

CALL FOR PAPERS

ICBGBE 2020
Jun 11-12, 2020
Copenhagen, Denmark

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBGBE 2020 : International Conference on Borehole Geophysics and Borehole Environment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Borehole Geophysics and Borehole Environment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Borehole geophysics
Geophysical well logging
Geophysical borehole logging
Borehole environment
Geophysical well logging methods
Electrical methods
Radioactive methods
Geohydrologic characterization
Types of logs
Equipment and methods
Field work

Natural gamma radiation
Gamma-gamma density
Magnetic susceptibility
Single point resistance and normal resistivities
Wenner resistivity
Borehole radar
Full waveform sonic
Borehole image
Interpretation of geophysical logs, aquifer tests, and water levels
Magnetic susceptibility logs
Problems and limitations
