

CALL FOR PAPERS

ICGECE 2020
Jun 11-12, 2020
Copenhagen, Denmark

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGECE 2020 : International Conference on Geophysical Exploration and Civil Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geophysical Exploration and Civil Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geophysical exploration

The principles and limitations of geophysical exploration methods
Geophysical exploration methods
The principles and limitations of geophysical exploration methods
Geophysical data processing
Elements of seismic surveying
Seismic reflection surveying
Seismic refraction surveying
Gravity surveying
Magnetic surveying

Electromagnetic surveying
Electrical surveying
Radiometric surveying
Geophysical borehole logging
Mineral exploration
Hydrocarbon exploration
Ground penetrating radar
Spectral-analysis-of-surface-waves
Full waveform inversion
Other techniques
