

# CALL FOR PAPERS

**ICGEMS 2020**  
**Jun 11-12, 2020**  
**Copenhagen, Denmark**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEMS 2020 : International Conference on Geostatistical Earth Modeling Software is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geostatistical Earth Modeling Software. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geostatistical software  
Geostatistical modeling software  
Geostatistical modeling  
Geostatistical spatio-temporal models  
Data analysis and predictions  
Geostatistical approach  
Simulation  
Descriptive analysis  
Open source code versus black-box soft  
Main functionalities  
Affordability and user-friendliness

Geostatistical mapping  
The random function concept  
Inference and stationarity  
Variogram  
Kriging  
Stochastic simulation  
Computer requirements  
Data files  
Search strategies  
Data set
