

# CALL FOR PAPERS

**ICIDBHC 2020**  
**Jun 11-12, 2020**  
**Copenhagen, Denmark**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIDBHC 2020 : International Conference on Implant Design and Bone Healing Considerations is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Implant Design and Bone Healing Considerations. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Implant design  
Implant design, geometry and placement  
Biomechanics of implant placement and loading  
Bone healing considerations  
Loading protocols  
Primary implant stability  
Secondary implant stability  
Implant geometry  
Static and dynamic stresses  
Insertion torque  
Perifixtural bone loss  
Bone-implant interface  
Implant surface designs

Macro design  
Micro design  
Implant materials  
Surface morphology  
Surface coating  
Thread shape  
Thread design  
Implants with different lengths  
Implant width  
Technological innovations, opportunities and challenges  
Clinical technology  
Clinical healthcare technology  
Health information technology
