

CALL FOR PAPERS

ICCMC 2020
Jun 17-18, 2020
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMC 2020 : International Conference on Carbon Materials for Catalysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbon Materials for Catalysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon materials for catalysis
Design of efficient carbon-based catalytic systems
Role of carbon materials in industrially important organic transformations
Influence of carbon-based supports in photocatalysis
Impact of carbon-oriented catalysts in electrocatalysis

Carbon materials and their efficacy in energy remediation
Catalytic assets of heteroatom containing carbon
Carbon materials as catalysts
Metal complexes anchored on carbon support in catalysis
