

CALL FOR PAPERS

ICCPEA 2020
Jun 17-18, 2020
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPEA 2020 : International Conference on Conductive Polymers and Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Conductive Polymers and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Conductive polymers
Electrically conductive polymers
Structural and electrical study of conductive polymers
Electrochemical properties of conductive polypyrrole
Molecular structure of conductive polymers
Electronic structure of intrinsic conjugated polymers
Doping structures of conductive polymers
Charge carriers in conductive polymers

Conductive polymer-based multifunctional materials
Conductive polymers for smart textile applications
Stabilization of conductive polymers
Conductivity characteristics of conductive polymers
Electrochemical properties of conductive polypyrrole
Synthesis of conductive polymers
Molecular basis of electrical conductivity
Properties and applications of conductive polymers
