

CALL FOR PAPERS

ICNSCN 2020
Jun 17-18, 2020
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNSCN 2020 : International Conference on Network Science for Communication Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network Science for Communication Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Topology design and analysis
Traffic modelling and traffic routing
Authentication, security, privacy, trust in networks
Internet of Things
Fault tolerance, reliability and survivability
Multiplex and interdependent networks
Network robustness, resilience, phase transitions

Delay tolerant networks
Dynamic and time-varying networks
Community detection and analysis
Social networking and big data analytics
Epidemics and rumours in networks
Network evolution and growth mechanisms
Information diffusion and knowledge transfer in networks
