

# CALL FOR PAPERS

**ICBMAF 2020**  
**Jun 04-05, 2020**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBMAF 2020 : International Conference on Biomolecular Materials and Amyloid Fibrils is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomolecular Materials and Amyloid Fibrils. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

DNA nanotechnology  
Self-assembling peptides and proteins  
DNA self-assembled monolayers  
Amyloid fibrils  
Virus-like particles

Protein and DNA hydrogels  
Biomolecular lithography  
DNA and protein-mediated assembly of nanoparticle lattices  
Biomolecule-templated plasmonic, photonic, electronic, and sensing devices  
Biomolecular vehicles for drug delivery
