

CALL FOR PAPERS

ICBME 2020
Jun 04-05, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBME 2020 : International Conference on Biomolecular Materials and Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomolecular Materials and Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

DNA nanotechnology
Self-assembling peptides and proteins
DNA self-assembled monolayers
Amyloid fibrils
Virus-like particles

Protein and DNA hydrogels
Biomolecular lithography
DNA and protein-mediated assembly of nanoparticle lattices
Biomolecule-templated plasmonic, photonic, electronic, and sensing devices
Biomolecular vehicles for drug delivery
