

# CALL FOR PAPERS

**ICCMC 2020**  
**Jun 04-05, 2020**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMC 2020 : International Conference on Carbon Materials in Catalysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbon Materials in Catalysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon materials for catalysis  
Design of efficient carbon-based catalytic systems  
Role of carbon materials in industrially important organic transformations  
Influence of carbon-based supports in photocatalysis  
Impact of carbon-oriented catalysts in electrocatalysis

Carbon materials and their efficacy in energy remediation  
Catalytic assets of heteroatom containing carbon  
Carbon materials as catalysts  
Metal complexes anchored on carbon support in catalysis
