

CALL FOR PAPERS

ICDMN 2020
Jun 04-05, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMN 2020 : International Conference on Dielectric Materials and Nanodielectrics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dielectric Materials and Nanodielectrics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dielectric permittivity
Relaxations
Molecular mobility
Polarization
Interfacial effects
Conductivity mechanisms
Phase transitions

Electroresponsive materials
Piezo/ferro/pyroelectrics
Polar oxides
Multifunctional materials
Nanodielectrics
Polymer composites
Energy materials
