

CALL FOR PAPERS

ICSS 2020
Jun 11-12, 2020
Osaka, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSS 2020 : International Conference on Superhydrophobic Surfaces is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Superhydrophobic Surfaces. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superhydrophobicity

Recent developments in superhydrophobic surfaces
Superhydrophobicity phenomena in nature
The theory of superhydrophobic surfaces
Fabrication of superhydrophobic surfaces
Applications of superhydrophobic surfaces
State-of-the-art studies on corrosion resistant coatings using superhydrophobic coatings
The stability of the superhydrophobic surfaces

Natural superhydrophobic surfaces
The design of superhydrophobic surfaces
Hydrophobicity of nonwetting soils
Superhydrophobic polymers
Metallic superhydrophobic surfaces
Applications of nanotextured surfaces
Biological interactions with superhydrophobic surfaces
