

CALL FOR PAPERS

ICMSSDSM 2020
Jun 25-26, 2020
Oslo, Norway

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSSDSM 2020 : International Conference on Mining Systems Simulation and Deep Sea Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mining Systems Simulation and Deep Sea Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Deep sea mining and exploration
- Mine mechanization and ventilation
- Environment, regulations and technology
- Modelling, simulation and optimization
- Legal and Environmental aspects of seafloor mineral development
- Process control and optimisation
- Mining systems simulation
- Moving towards production
- Risk assessment and management in sea mining
- Sustainable development of seabed mineral resources

- Sustainable seabed mining
- Seafloor massive sulphides and manganese nodules
- Ferromanganese crusts
- Polymetallic nodules
- Mining the seafloor and the potential for growth
- Economics and finance of deep sea mining
- Environmental impacts of seabed mining
- Developments in exploitation technologies for seabed mining
- Practical guidance from regional government authorities
