

CALL FOR PAPERS

ICACCI 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACCI 2020 : International Conference on Advances in Coordination Chemistry and Isomerism is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Coordination Chemistry and Isomerism. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Synthesis of novel coordination compounds

Synthesis of coordination compounds with tailor-made ligands for specific application

Synthesis of coordination compounds with multitopic ligands

Isomerism

Solid state structures and intermolecular interactions

Coordination compounds with extended structures or metal organic frameworks

Spectroscopic properties

Magnetic properties

Coordination compounds as model compounds

Coordination compounds as catalysts
