

CALL FOR PAPERS

ICCDSP 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCDSP 2020 : International Conference on Communications and Digital Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Communications and Digital Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Communications systems and theory
- Modulation
- Coding theory and techniques
- Fading channels
- Chip design for communications
- Multiplexing
- Adaptive modelling
- Modelling and simulation techniques
- Filtering techniques
- Noise reduction
- Transmission diversity
- New techniques in RF-design and modelling

- Demodulation
- Communications for disaster management
- Synchronization
- Teletraffic models and traffic engineering
- Queuing theory
- Microwave communications
- New techniques in RF-design and modelling
- Satellite and space communications
- Radio communications
- Speech technology
- Digital signal processing (DSP)
