

# CALL FOR PAPERS

**ICCPR 2020**  
**Jun 05-06, 2020**  
**San Francisco, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPR 2020 : International Conference on Conductive Polymers Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Conductive Polymers Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Conductive polymers  
Electrically conductive polymers  
Structural and electrical study of conductive polymers  
Electrochemical properties of conductive polypyrrole  
Molecular structure of conductive polymers  
Electronic structure of intrinsic conjugated polymers  
Doping structures of conductive polymers  
Charge carriers in conductive polymers

Conductive polymer-based multifunctional materials  
Conductive polymers for smart textile applications  
Stabilization of conductive polymers  
Conductivity characteristics of conductive polymers  
Electrochemical properties of conductive polypyrrole  
Synthesis of conductive polymers  
Molecular basis of electrical conductivity  
Properties and applications of conductive polymers
