

CALL FOR PAPERS

ICCSCG 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSCG 2020 : International Conference on Computational Statistics and Computational Geometry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Statistics and Computational Geometry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational statistics
Statistical methodology
Mathematics and computing
Computational methods in statistics
Optimization methods for computational statistic
Computational algebraic geometry
Computational group theory

Computational geometry
Computational number theory
Computational topology
Computational statistics and data analysis
Computational statistics and machine learning
Applications
