

CALL FOR PAPERS

ICENES 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICENES 2020 : International Conference on Emerging Nuclear Energy Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Emerging Nuclear Energy Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Accelerator Driven Subcritical System
Accelerator Driven Systems
Advanced Fission Systems
Advanced Fuels and Materials
Advanced Technology and Other Issues
Alternative and hybrid energy systems
Co-Generation and Non Electricity Production Applications
Deep Space Exploration, general
Emerging Nuclear Energy Systems
Energy policy, conversion and management
Exotic Nuclear Reactor Concepts
Expanded Applications
Facility and Component Development

Fusion Driven Subcritical System
Fusion Energy Systems
Generation IV Reactors
Human Resources and Social Issues
Hybrid Nuclear Energy Systems
Hydrogen Energy
Hydrogen Energy, general including non-nuclear applications
Inertial Confinement Fusion System
Knowledge, and Management
Magnetic Confinement Fusion System
Modeling, Database and Simulations
Nuclear Energy
Nuclear Hydrogen Production
