

# CALL FOR PAPERS

**ICICSPA 2020**  
**Jun 05-06, 2020**  
**San Francisco, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICSPA 2020 : International Conference on Information Communications and Signal Processing Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information Communications and Signal Processing Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adaptive filtering and signal processing  
Ad-hoc and sensor networks  
Analog and mixed signal processing  
Array signal processing  
Audio and electroacoustics  
Audio/speech processing and coding  
Bioimaging and signal processing  
Biometrics and authentication  
Biosignal processing and understanding  
Communication and broadband networks  
Communication signal processing  
Computer vision and virtual reality  
Cryptography and network security

Design and implementation of signal processing systems  
Digital signal processing  
DSP implementations and embedded systems  
Hardware implementation for signal processing  
Higher order spectral analysis  
Image and multidimensional signal processing  
Image processing and understanding  
Image/video processing and coding  
Industry technology  
Internet signal processing  
Machine learning for signal processing  
Modulation and channel coding
