

CALL FOR PAPERS

ICMEPSMFP 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMEPSMFP 2020 : International Conference on Molecular Exercise Physiology and Skeletal Muscle Fibre Plasticity is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Molecular Exercise Physiology and Skeletal Muscle Fibre Plasticity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular exercise physiology
Sport and exercise genetics
Signal transduction and adaptation to exercise
Molecular adaptation to endurance exercise
Molecular biology of muscle adaptation
Molecular regulation of adaptation to exercise

Molecular mechanisms of exercise
Skeletal muscle fibre plasticity
Genetics and endurance sports
Molecular sport nutrition
Molecular exercise immunology
Acute responses and chronic adaptations
