

CALL FOR PAPERS

ICSCA 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCA 2020 : International Conference on Software and Computer Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software and Computer Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

AI and Knowledge based software engineering
Artificial Intelligence
Aspect-orientation and feature interaction
Business Process Reengineering & Science
Communication Systems and Networks
Component-Based Software Engineering
Computer & Software Engineering
Cost Modeling and Analysis
Data Mining and Knowledge Recovery
Design & Process Engineering & Science
Information Systems Engineering
Internet and information systems development
Middleware Design Techniques

Mobile/Wireless Computing
Modeling with UML
Object-Oriented Technology
Parallel and Distributed Computing
Patterns and frameworks
Process Management & Improvement
Program comprehension and visualization
Programming languages
Reengineering, Reverse Engineering
Reliability Modeling and Analysis
Requirements Engineering
Reverse engineering and maintenance
Safety and Security Critical Software
