

CALL FOR PAPERS

ICSEB 2020
Jun 05-06, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEB 2020 : International Conference on Structural Enzymology and Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Enzymology and Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural enzymology
Protein engineering
Structural and mechanistic enzymology
Bio-chemical pathways of enzymes
Metabolic pathway of enzymes
Activation energy of enzymes
Lock and key model of enzymes
Exploitation of enzymes

Structural and computational enzymology
Structural and functional analysis of proteins
Crystal structures of enzymes
Structural, functional and mutagenesis studies
Protein flexibility and enzymatic catalysis
Enzyme function and dynamics
Experimental studies of enzyme mechanisms
